                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              δ
                                  Sequence 1, Application US/07971978
Patent No. 5614617
CENERAL INFORMATION:
APPLICANT: Cook and Sanghvi
TITLE OF INVENTION: Muclease Resistant, Pyrimidine
TITLE OF INVENTION: Modified Oligonucleotides that Detect and Modulate
TITLE OF INVENTION: Gene Expression
NUMBER OF SEQUENCES: 65
CORRESPONDENCE ADDRESS:
ADDRESSEE: No. 56146177is
STREET: One Liberty Place - 46th Floor

Patent No. 585923
GENERAL INFORMATION:
APPLICANT: Bernard Hirschbein
APPLICANT: Sarah McGurdy
APPLICANT: Sarah McGurdy
APPLICANT: Jeffery Nelson
APPLICANT: Gift Dhase Synthesis of Oligonucleotide
TITLE OF INVENTION: Solid Phase Synthesis of Oligonucleotide
TITLE OF INVENTION: 13 {symbol 174 \ f "Symbol" \ s 12 \} P5 Phosphoramidates
NUMBER OF SEQUENCES: 10
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 .

                                                                                                                                                                                                                                                                                                      Sequence 1, Application US/09167375B
Patent No. 6291438
GENERAL INCERNATION:
APPLICANT: Uni H. Wang
TITLE OF INVENTION: Antiviral anticancer poly-substituted phenyl derivatized oligorib
TITLE OF INVENTION: Antiviral anticancer poly-substituted phenyl derivatized oligorib
FILE REFERENCE: Wang 2002 (GIP-1)
CURRENT APPLICATION NUMBER: US/09/167,375B
CURRENT FILING DATE: 1998-10-06
NUMBER OF SEQ ID NOS: 26
SEQ ID NO 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ·;

Patent No. 6414135
GENERAL INFORMATION:
PAPLICANT: Cook, Philip Dan
APPLICANT: Mandy Tingmin
APPLICANT: Mandy Tingmin
APPLICANT: Mandy Tingmin
TITLE OF INVENTION: C3'-Methylene Hydrogen Phosphonate Monomers and Related Compounds
FILE REFERENCE: Isis-3311
CURRENT FILING DATE: 1999-07-07
NUMBER OF SEQ ID NOS: 11
SOFTWARE: Patentin version 3.1
SEQ ID NO 2
LENGTH: 19
                                                                                       APPLICANT: Barber-Guillem, Emilio
APPLICANT: Nelson, M. Bud
APPLICANT: Nelson, M. Bud
APPLICANT: Nelson, M. Bud
APPLICANT: Castro, Stephanie
TITLE OF INVENTION: Nanocrystals having polynucleotide strands and their use to form

Sequence 155, Application US/09676610B

Patent No. 6444465

GENERAL INFORMATION:

APPLICANT: Used No. 644465

APPLICANT: Used No. 644465

TILLE OF INVENTION: OLIGONUCLEOTIDE INHIBITION OF HER-1 EXPRESSION

FILE REFERENCE: RTS-0138

CURRENT APPLICATION NUMBER: US/09/676,610B

CURRENT FILING DATE: 2000-09-29

NUMBER OF SEQ ID NOS: 182

LENGTH: 20

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 1, Application US/09462569B

Patent No. 6397124

GENERAL INFORMATION

APPLICANT: FORZ ASCASO, Fernando

APPLICANT: FORRES PASCUAL, Vicente

APPLICANT: FORMES PASCUAL, Vicente

APPLICANT: TARNEREZ SANCHEZE, Florentina

APPLICANT: MARTINEZ HERRERA, David SAPPLICANT: MARTINEZ HERRERA, David SAPPLICANT: THE TURNITON: THE TURNIP MOSAIC VIRUS (Tumv)

FILE REFERENCE: P/613-110

CURRENT APPLICATION NUMBER: US/09/462,569B

CURRENT FILING DATE: 2000-04-03

PRIOR APPLICATION NUMBER: PCT/ES98/00200

PRIOR APPLICATION NUMBER: ES P 9701522
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ·

Sequence 17, Application US/08882164D

Patent No. 6306664;
GENERAL INFORMATION:

APPLICANT: Petkovich, P. Martin, White, Jay A.,

APPLICANT: Beckett, Barbara R., Jones, Glenville

TITLE OF INVENTION: Retinoid Metabolizing Protein

NUMBER OF SEQUENCES: 43

CORRESPONDENCE ADDRESS:

ADDRESSE: Blake, Cassels & Graydon

STREET: Box 25, Commerce Court West

CITY: Toronto
